

[Video Village](#) is fully wired with distribution to The Client Room, the Conference Room, the Wardrobe area, to Hair & Make-Up, and of course to 3 HD monitors on set.

It takes an SDI input and has SDI to HDMI converters, is capable of distributing audio, and features a Black Magic Studio Production tool to be able to accept 4 inputs, plus has Premier Pro downstream for instant on-set rough edits, composites, and graphics.

It's the perfect set-up to insure frame accurate matched moves using our motion control system.

In addition, we now feature a full HD resolution Live Video Streaming capability.

We've also added 2 Ki-Pro HD decks.
